

Notes from Homestake

Milind Diwan

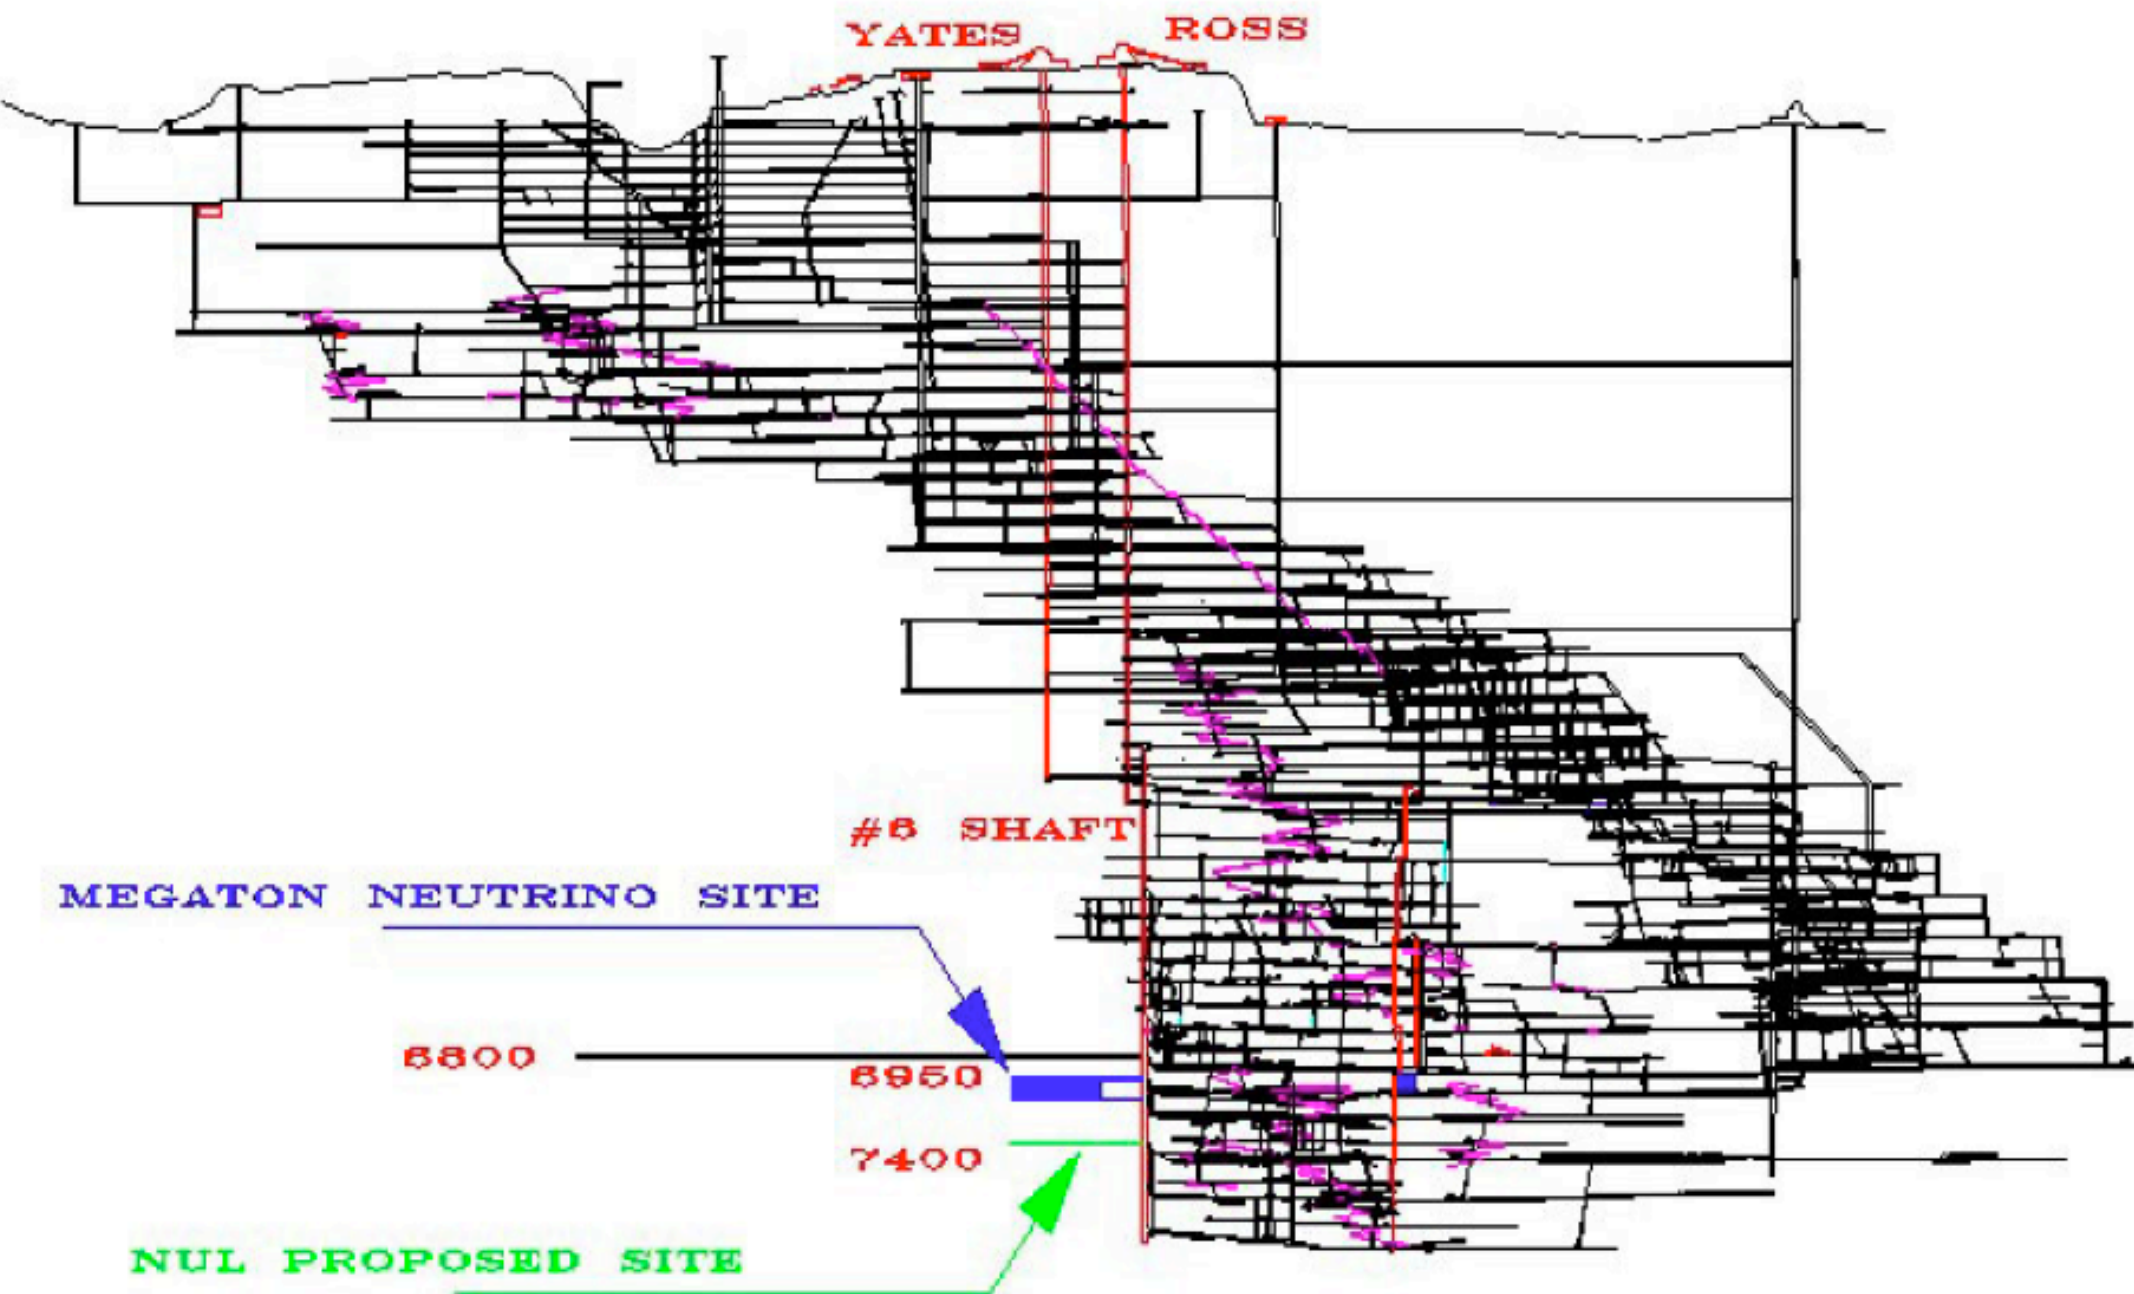

11/5/2004

Ross

Yates

- Went on a trip of the surface facilities at Homestake. Tom & Mellisa Campbell, Ila Pillamarri.

- The big hole: 800 ft deep. first claim was here

- Formation that brought minerals up.
age: 2billion yrs

drift opening

- Concrete has been used to stabilize.

- Looking south towards grizzly gulch. Main mine workings are actually under the valley.

Grizzly gulch closeup

- Air intake shaft:
Oro-hondo in
the valley.

Flags and Apples
near the Yates
facilities.

Yates from Ross

Ross from Yates

Why did they build these on the hills ?

Yates details. Left is the hoist building and right is the shaft. Openings are boarded up.

Water
treatment.
Water is
brought from
Grizzly gulch
here and sent
back.

Ski area visible from Ross facility. Peak goes to about 7000 ft.
